

A diagram showing a circular cross-section of a multi-layered cylinder. The cross-section is composed of several concentric circles. The innermost region is a small circle with a thick black outline, representing a central hole. Surrounding this are several more concentric circles, each with a thinner black outline. A vertical dashed line and a horizontal dashed line intersect at the center of the circles. On the left and right sides of the diagram, there are horizontal lines with arrows pointing upwards, labeled 'B', indicating the thickness of the layers.

[illegible]

The diagram illustrates the assembly of a multi-layered cylindrical structure. It shows three stages: 1. A base structure with multiple concentric rings. 2. A separate ring (labeled 2) being positioned above the base. 3. The final assembly where the ring (2) is placed on top of the base structure (1).
