

This exploded view diagram illustrates the assembly of a sliding door system. The components are numbered 1 through 16, with green arrows indicating their relative positions and assembly sequence. The main parts include the door panel (1), rollers (2, 3), tracks (4, 5), and various mounting brackets and hardware (6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16). The diagram shows the door panel being mounted onto the rollers, which are then secured into the tracks. The rollers are further supported by brackets and hardware, ensuring smooth operation. The bottom track is shown with a separate component (10) that likely serves as a guide or seal. The overall assembly is designed for a secure and functional sliding door mechanism.

* バンド取手は任意の位置に固定できます。
* Carrying handle location can be freely affixed within denoted range.

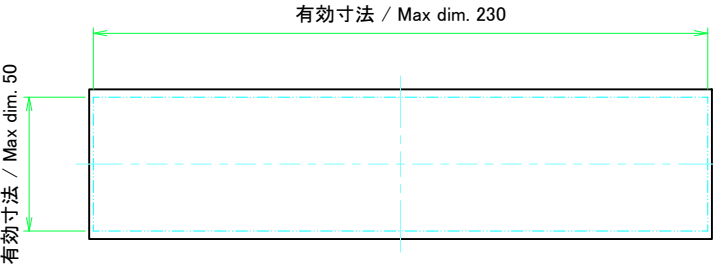

取手耐荷重 / Carrying handle Maximum load : 20kgf
