IP67 WATERPROOF HAND-HELD ENCLOSURE

● IEC60529 standard is a system for classifying the degrees of protection provided by the enclosures of electrical equipment, such as against dust and water.

IP6x : No ingress of dust; complete protection against contact (dust tight).

IPx7 : No ingress of water when submerged up to a depth of 1 meter for 30 minutes

High waterproof performance with a silicone gasket

High elasticity and good durability for maintaining waterproofing capability.

Built-in insert nut use for great long lasting water protection even after frequent opening and closing.

Battery compartment is also waterproofed.

Various battery compartment types are available, ranging from AAA x2, to AA x6.

Side grip provides great protection

Elastic TPE grips provides for a more secured hold.

Side grips are designed to be on the sides and corners of the enclosure to minimize drop impact.

Available in 10 different color combinations.

How to Make Waterproof Buttons and Switches

Please utilize a waterproof membrane keypad or membrane switch.

Note that the waterproof ability will be voided if holes are made for buttons or switches on the waterproof enclosures.

IP67 PORTABLE CASE WC SERIES

● IEC60529 standard is a system for classifying the degrees of protection provided by the enclosures of electrical equipment, such as against dust and water.

IP6x : No ingress of dust; complete protection against contact (dust tight).

IPx7 : No ingress of water when submerged up to a depth of 1 meter for 30 minutes

High waterproof performance with both TPE and silicone gasket

ABS and TPE double-shot molded top & bottom covers allows for a good waterproof seal.

The durable silicone gasket maintains the battery lid seal.

Insert nut and screw allow the battery compartment to remain durable even after repeated opening/closing.

Great protection by TPE sides

Side grips in TPE material provides a comfortable grip and protection against drop impact.

3 color combinations available

APPLICATION EXAMPLE

Best for outdoor use as a remote control, RFID tag, compact GPS, wireless device, simplified measurement gadget and so on.

We are able to manufacture embossed or standard overlay sheets with low initial costs.

Waterproof performance may be lost by drilling/milling holes or cut-outs for buttons or switches on waterproof enclosures.

Use an IP rated overlay sheet, or membrane keypad in order to allow the milled area to remain waterproof.

Advantage 1 Reduce initial cost with digital inkjet printing.

Advantage 2 Reduce initial tooling cost for cutting die with digital cutting plotter.

Advantage 3 Reduce initial tooling cost for embossing with in-house mold processing.

Advantage 4 Shorter lead time made possible by having all production be in-house.

- Double shot injection molded TPE Grip and ABS Body.
- New AAA x 2 battery compartment model added. Case with a CR2032 coin battery, and no battery compartment types are also available. Solder battery contacts on PCB for CR2032 models.
- TPE side grip provides not only a comfortable grip, but also protects from drop impact.
- Suitable to be used as a remote controller, key fob, wireless device, RFID tag, and so on.
- See page WC-4 for coin battery contact installation step.

CNC MACHINING

CNC milling is a form of computer controlled machining. Similar in operation to drilling and cutting, it is able to create various hole styles and shapes by using a rotating cutting tool to bore into the object.

- Mainly used for plastic, aluminium die-cast, and aluminium extrusion material types.
- Able to perform milling for various shapes and sizes.
- Recommended for small quantity customization.
